

Laser Discharge Instructions

1. You may experience some blurriness or it may seem that your vision is "bleached out". It will resume back to normal after one to four hours.
2. If you notice decreased vision or new symptoms develop, please call our office. We are available 24 hours a day. If the call is placed after business hours (8am-5pm), our "on-call" physician will help you.
3. Use Tylenol for any discomfort as manufacturer suggests. If the pain becomes severe, please call.
4. Resume all medications.
